Summary

I am an aspiring IT professional and developer with experience in building web and desktop applications. I have participated in projects such as Event Management Systems and Administration Systems, focusing on creating practical and user-friendly solutions. Through these projects, I have developed functional systems, strengthened my problem-solving abilities, and continuously expanded my technical knowledge. I am motivated by innovation and growth, and I am always eager to learn new technologies, tools, and modern practices in the IT industry.

Skills

- Web Development
